

Alex Wall

St. John's, NL, CAN | alexwall444@gmail.com |  alexwall4

Professional athlete entering tech, pursuing an Analytics tech role with graduate training in data analytics and computer science, leveraging discipline, teamwork, and experience in data systems and machine learning.

SKILLS

Programming & Tools: Python | SQL | R | Excel | Git

ML & AI: scikit-learn | caret | Regression | Classification | Validation

Data Analysis & Statistics: pandas | NumPy | PyMC | Data Cleaning | Feature Engineering | EDA | Bayesian

Visualization & Reporting: LaTeX | Tableau | Markdown | Jupyter | matplotlib | ggplot2

Software & Systems Engineering: Software Development Processes | Agile | Debugging | Databases

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY (Georgia Tech)

Atlanta, GA

M.S., Computer Science - Machine Learning Specialization

Expected: 12/2027

M.S., Analytics - Analytical Tools Track

08/2023

UNIVERSITY OF NEW BRUNSWICK (UNB)

Fredericton, NB

B.Sc., Electrical Engineering

05/2016

UNIVERSITY OF PRINCE EDWARD ISLAND (UPEI)

Charlottetown, PEI

B.Sc., Mathematics

05/2014

Relevant Coursework: Data Mining & Statistical Learning, Regression Analysis, Computational Data Analysis, Data & Visual Analytics, Analytics Modeling, Data Analytics for Business, Bayesian Statistics

PROJECTS

CAPSTONE PROJECT - Georgia Tech

- **Analytics team member** that studied correlations between healthcare availability and rural mortality rates.
- **Designed a data architecture and pipeline** using data collection and data aggregation for analysis.
- **Used pandas for data preprocessing, upsampling and interpolation** to increase resolution for analysis.
- **Developed and tuned a time series model in Python** to forecast county-level healthcare outcomes.
- **Delivered findings in a LaTeX report** detailing methodology, analysis and recommendations.

NHL AWARD PREDICTIONS - Georgia Tech

- **Acquired and cleaned** historical NHL award data using Python (pandas).
- **Performed exploratory data analysis** with visuals in R (dplyr, ggplot2) to generate insights for modeling.
- **Built and evaluated regression models** (linear, LASSO, random forest, KNN) using cross-validation.
- **Summarized findings in LaTeX**, highlighting predictive accuracy and the modeling process.

SHORT TERM RENTAL ANALYSIS - Georgia Tech

- **Performed data cleaning, feature engineering, and EDA** on real estate and AirBnB data in R.
- **Conducted statistical analyses** on several regression models built with cart and glmnet.
- **Predicted housing prices and rental profitability** by identifying undervalued properties.
- **Provided documentation using RMarkdown** with recommendations.

EXPERIENCE

PROFESSIONAL ICE HOCKEY PLAYER | Austria, Norway, USA

08/2016-04/2026

- **Adapted and collaborated** effectively within varied team dynamics.
- **Time-managed** efficiently across training, travel, and competition while pursuing graduate studies.
